

Upgrade the Desktop

Windows 7 and Microsoft Office 2007 Data Sheet

I need tools that just work.

Windows 7 and Microsoft Office 2007 for small and midsize organizations

Windows 7 is here!

There's no better time to think about upgrading.

With the cost and complexity of managing your IT environment on the rise and your resources stretched to the limit, you need a modern desktop that can help you build an agile, flexible, and more easily managed IT infrastructure.

And that's precisely what Windows® 7 was designed to do: enable organizations to help their users be more productive everywhere, to enhance security and control, and to streamline the management of their computers.

So, too, the Microsoft® Office 2007 suite of software tools was designed to help you run smarter, leaner, and safer.

When installed on your desktops, these two products:

Work the way you want.

- Windows 7 is designed to be faster and more reliable than Windows Vista® Service Pack 1, and enables a wide variety of devices and applications, including many older applications for Windows XP. Windows 7 also makes it easier to solve computer problems quickly and to share files and devices—whether you have a server or not.

Help you get more done.

- Windows 7 and Microsoft Office 2007 make it easier than ever to find what you need quickly and to work smarter and more intuitively. They also enable workers to be more productive on the road and to collaborate and share across boundaries.

Help you safeguard your work.

- Windows 7 has a strong security foundation with features that help protect users and systems against malicious software and other forms of security threats. In addition, Microsoft Office 2007 incorporates new features that defend the organization against spam, phishing, and the loss of intellectual property.

Best of all, you can save money on both of these Microsoft products right now, thanks to this limited-time special offer:

Office Professional Plus 2007 ¹	<p>Save 20 percent—there's no better time to buy Microsoft Office 2007 with the Microsoft Office Professional Plus 2007 program.</p> <p>For a limited time, your business can license Microsoft Office Professional Plus 2007 with an automatic upgrade to Microsoft Office 2010 at launch—all at a 20 percent discount. Make the smart investment to strengthen your business today and be ready for growth tomorrow.</p>
--	--

¹Applies to government customers.

Modern desktop software designed to take you to the next level.

Windows 7 Professional offers core business features (networking, security, mobility, and IT management) that are essential to support your organization's needs and the IT professionals who keep your computers running:

- Compatible with a wide array of software and devices
- Fast, reliable, and responsive
- Intuitive and powerful backup and security features
- Easy-to-use, streamlined navigation and search
- Saves energy with smart power management

Choose the right Windows 7 for you:

	Home Premium	Professional	Enterprise*/ Ultimate
Makes the things you do every day easier with improved desktop navigation.	√	√	√

*Windows 7 Enterprise is available only through Microsoft Software Assurance.

¹Additional hardware may be required. Not available in all countries.

²Windows XP Mode requires either OEM preinstallation or post-purchase installation of Windows XP Mode (which runs on Windows 7 Professional or Ultimate) and a virtualization technology, such as Windows Virtual PC. Both Windows XP Mode and Windows Virtual PC can be downloaded from www.windows.com/business/downloads. For more information on system requirements, go to www.microsoft.com/virtual-pc.

Microsoft Office 2007 introduces a streamlined user interface and powerful capabilities that help organizations succeed by making it easier to more effectively manage, analyze, and share information:

- Improve productivity through easy-to-create shared documents.
- Simplify collaboration instantly with innovative security technologies and instant messaging, making it easy for people to communicate directly within the rich, familiar, and intuitive interface of their Microsoft Office desktops.
- Provide employees with the tools to effectively manage an ever-increasing workload.
- Better manage network bandwidth and storage by reducing file size.
- Help ensure protection of your company's critical information.

Choose the right Microsoft Office 2007 suite for you:
