

# Bringing you a chat-based workspace

Microsoft Teams brings chat, content, people and tools together, all in one hub, wherever you are.

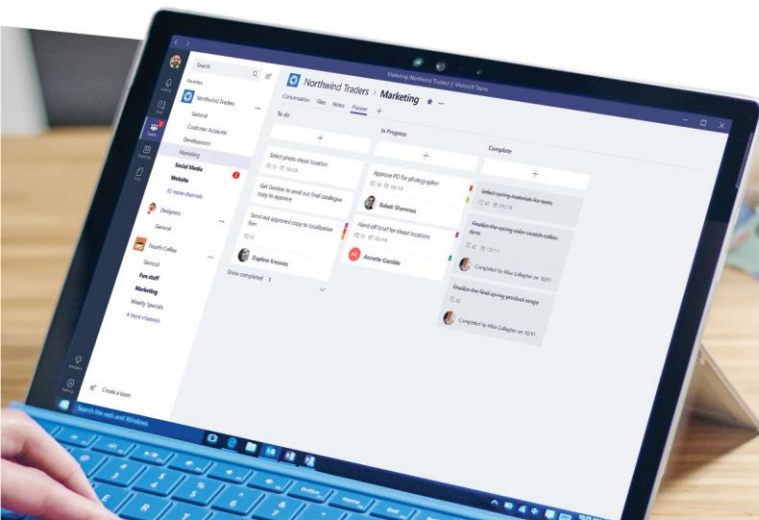

## Chat for today's teams

Communicate in the moment and keep everyone in the know. Chat in teams, privately one-on-one or in groups. Audio and video calls are just a click away and notifications and chat history ensure everyone is kept up to date. Access Microsoft Teams on any device with confidence knowing it's been built with enterprise-level security from Office 365.

## A hub for teamwork

Give your team access to the information they need, right in Office 365. Chat, content and tools are all in the team workspace. SharePoint, OneNote and Skype for Business are built in and you can open Office and other documents right in the app.

## Customize for each team

Tailor your workspace to include the content and capabilities your team needs every day. Tabs and Connectors provide quick access to frequently used documents, websites and 3rd party apps such as Trello, GitHub and Asana.
